

Chain Longevity Test - Wear to 0.5% - Digital Chain Wear checker vs Pure elongation only.

*Not all chains have chromium hardened rollers, such treatments treatment may be only have been applied to pins, and - there are chrome treatments and then there ar

Digital Chain Wear Checker vs Pure elongation wear measure

Efficiency (watts loss) vs Lifespan to 0.5% (kms)

*Watts loss are final average across 13 hour test.

AXS road still to be longevity tested. Eagle chains unable to be check measured due to frozen rollers, however attained 7000km from pure elongation wear mea
